

The Super CMT1*: Cleaning and Condensation Management Tool, by TheSuper.com, Inc.

*pair w/telescopic handle for high-elevation use

CMT1: Condensation Management Tool v1

CMT1 is specially designed to be combined with The Super PVA Sponge, 11" or 16" (7" available in 2025)

The Super PVA sponge is a special polyurethane sponge with a continuous pore structure. Hard when dry, soft when wet, it has a fine, soft texture that uses capillary action to make it highly absorbent, wicking moisture ON CONTACT and trapping it in the center of the sponge.

It can be used in various production environments to scrub and dry equipment, ceilings, walls, pipes etc., and is resistant to both abrasion and hydrolysis. Long lasting, The Super PVA sponge has 45+ days recommended use in industrial environments before cycling out (depending on degree of use).

The Super PVA Sponge has a durability not found in cellulose sponges and can remove foreign substances sticking to a surface. Easy to maintain, doesn't lint, heat resistant, and can be used with industrial degreasers and sanitizers.

INSTRUCTIONS:

- **Soften The Super PVA sponge with warm/hot water**
- **Install sponge onto CMT1 using 4 stainless steel screws (included)**
- **Attach CMT1 using included adaptor to Unger Opti Loc or preferred telescopic pole**
- **Squeeze sponge with hand to remove excess water as needed**

1

MATERIAL:

FOOD GRADE Fiberglass reinforced Nylon 66 - shatter proof

2

LOW TEMP RESISTANT

To -20 degrees Fahrenheit - built for production environments

3

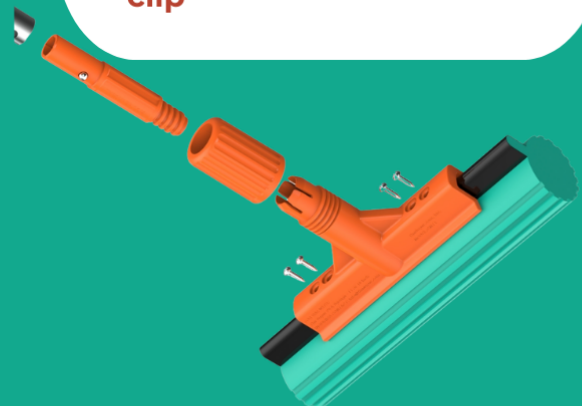

ANTIBACTERIAL

Biomaster612 - permanent silver ion antimicrobial protection built in

4

RUST PROOF

Stainless-steel screws and stainless-steel v-clip

The Super PVA Mop and Sponge

Industrial strength, durable mops for commercial and industrial use.

Pairs perfectly with the CMT1 (Condensation Management Tool V1) for heavy duty cleaning, condensation, and moisture control.

16 inch and 11 inch sizes

ABOUT THE SUPER PVA MOP

The Super PVA mop is a tool built with performance and durability in mind, using quality materials like virgin nylon, stainless steel, and aluminum.

Sponges are hard when dry, soft when wet, The Super PVA Sponge Mop is designed to withstand tough conditions - it can handle heavy duty cleaning environments, and effectively manage almost any cleaner except strong acids. Plus, with two sponge sizes available - 11" and 16" - it's perfectly suited for heavy-duty use in commercial and industrial environments.

The Super PVA mop stands out in strength, durability and construction. We take pride in saying this is the only mop you will ever need

ABSORBANT, picks up liquids fast, holding up to 12x its weight in liquids!

STRONG handle and abrasion resistant PVA sponge

RESISTANT against bacteria growth

SUPERIOR chemical tolerance

SWEEPS as it mops - loose debris is picked up and rinses right off

Excellent for cleaning, scrubbing, inexpensive and long lasting

Can be used with many industrial sanitizing agents, including:

- Hydrogen peroxide
- Ozone
- Peracetic acid/peroxyacetic acid
- Phosphoric acid
- Potassium hydroxide
- Sodium hydroxide
- Acetic acid
- Ethyl alcohol
- Isopropyl alcohol
- Citric products/limonene
- Potassium permanganate
- Sulfuric acid
- Vinegar
- Quaternary ammonia
